PROFESSIONAL SUMMARY

2024 B.Tech (Computer Technology) graduate with 6 months of DevOps internship experience and an additional 6-month structured DevOps course. Hands-on with AWS, Docker, Kubernetes, Terraform, Jenkins, and CI/CD pipelines. Built a live freelance project (art gallery website) using React & Vercel. Quick learner who adapts to new tech stacks rapidly — seeking roles in DevOps, cloud engineering, full-stack development, or any software domain.

TECHNICAL SKILLS

Cloud & Infra	AWS (EC2, S3, IAM, VPC, EKS, Route53, CloudWatch), Azure, GCP (basics)
DevOps & CI/CD	Jenkins, GitHub Actions, Docker, Kubernetes, Helm, Terraform, Ansible
Monitoring	Datadog, Prometheus, Grafana, SonarQube
Languages	Python, Bash, Shell Scripting, YAML, Groovy, JavaScript (React)
Databases	PostgreSQL, AWS RDS, DynamoDB
Web & Tools	Nginx, Apache, Git, GitHub, Linux, VS Code, Vercel, Node.js

PROFESSIONAL EXPERIENCE

DevOps Engineer Intern | HisanLabs Pvt Ltd *Pune | April 2026 – May 2026*

- Managed Linux-based environments including user management, server hardening, log analysis and shell scripting.
- Provisioned and maintained AWS services: EC2, S3, IAM, VPC, Route53, Auto Scaling, ELB, CloudWatch.
- Built and optimised Docker images and containers; orchestrated microservices using Kubernetes and Helm charts.
- Implemented Infrastructure as Code with Terraform; configured Jenkins CI/CD pipelines (freestyle + Groovy).
- Integrated SonarQube for code quality gates, and Datadog for APM, custom dashboards and alerts.
- Managed Ansible playbooks for configuration management and automated patching across servers.

Associate Trainee – DevOps | smartData Enterprises Inc. *Nagpur | Sept 2024 – Feb 2025*

- Completed 6-month structured DevOps training programme covering end-to-end DevOps lifecycle.
- Supported CI/CD pipeline monitoring and assisted with Docker-based application deployments.
- Performed routine Linux administration tasks; gained hands-on exposure to core AWS services.

FREELANCE & PROJECTS

Pranu Art Gallery Website | [Live Site](#) | *Freelance Project*

- Designed and deployed a full production website for a small art business using React and Vercel.
- Delivered end-to-end — from requirements gathering and UI design to deployment and client handoff.

Personal Portfolio | [Live Site](#)

- Built and deployed personal portfolio showcasing DevOps projects and web development work.

EDUCATION

B.Tech – Computer Technology | Kavikulguru Institute of Technology & Science | 2024 | CGPA: 7.4

Diploma – Information Technology | Government Polytechnic, Amravati | 2021 | 80.4%

CERTIFICATIONS & ADDITIONAL

- 6-Month DevOps Course – Covered Docker, Kubernetes, Terraform, Jenkins, AWS, CI/CD pipelines end-to-end.
- Adaptable across tech stacks – Successfully transitioned from web development to DevOps/cloud engineering; open to full-stack, backend, SRE, or any software engineering role.
- Currently exploring: GitHub Actions advanced workflows, AWS Solutions Architect concepts, and Python automation scripting.
